WHITEPAPER

INTRODUCTION

The Cryptocurrency universe is the center of innovation and new decentralization that will lead the way towards the ecosystem and empowerment of crypto. This will bring solutions to some of the most important issues in the world.

SEBATOKEN is a Binance Smart Chain-based cryptocurrency marketplace, where buyers and sellers meet to transact based on long-term speculative and views of great value.

SEBATOKEN is based on Binance Smart Chain BSC(BEP20).

SEBATOKEN will be a whole ecosystem that will provide features like Staking, NFT Marketplace and exchange.

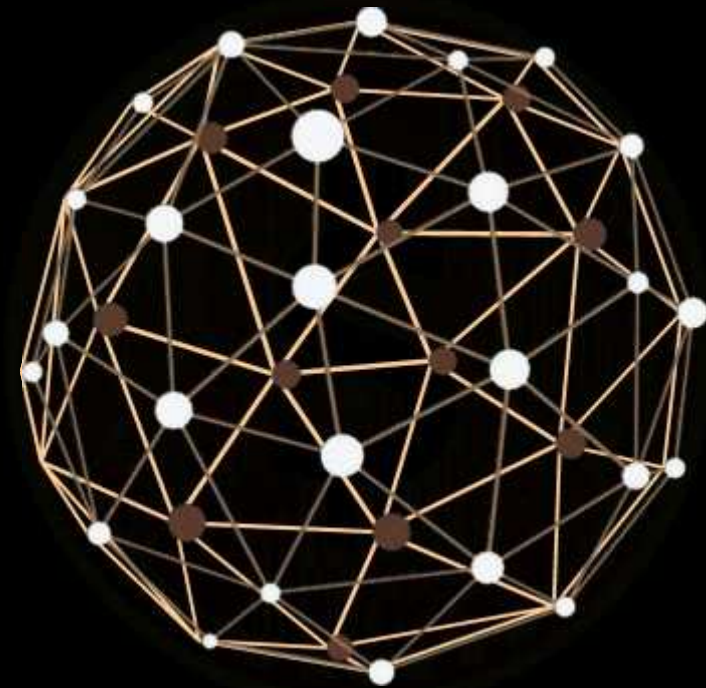

SEBATOKEN will develop its own unique NFT marketplace which will connect the decentralized community. Moreover, People will now be able to own exclusive rights on unique themes, animations, motion backgrounds, After Effect Templates, videos, music, and much more.

The Team behind SEBATOKEN are revolutionizing the market with a more open, accessible, and fair global financial system with a decentralized Binance-powered crypto swapping.

Staking will allow users to earn yield in a form of SEBA tokens.

Unlike, other conventional platforms our wallet allows

lenders/investors to generate more value to users' crypto assets.

MISSION

Our Vision is to bring innovation and perfection in delivering products and services to the Cryptocurrency universe.

Our mission is to provide our customers with comprehensive bundle of products and services delivered with integrity and efficiency.

An integration between innovation and flexible payment process is granted.

SEBATOKEN envisions that our customers be forward-thinking in using our services.

SEBATOKEN ensures that our products and services can be purchased and sold easily.

Our main objective is to provide people with a secure and easy way of purchasing our services.

SEBATOKEN will create a platform where users can buy and sell videos, animations, and other useful stuff.

ABOUT SEBATOKEN?

STOCK VIDEOS

You can find any clip of any scene you imagine in high quality, our stock videos are filmed by many creative creators around the world.

PROFESSIONAL REPORTS

Professional reports are what distinguish our website from similar sites. News agencies benefit from our professional reports a lot. Professional reports can be a documentary or News or anything.

MUSIC

We have contracted with famous music producers around the world to deliver the best music to satisfy every music taste and of course, with every track you buy you get a commercial use license.

ANIMATION

We provide wide range of animations. For Example: congratulation animation, after-effects templates, advanced effects, and motion backgrounds.

ECOSYSTEM

SEBATOKEN is a decentralized finance (DeFi) token on the Binance with three functions that take place during each trade: Reflection, Liquidity Pool (LP) Acquisition, and Staking. These functions work together to overcome messy problems caused by farming rewards, and price fluctuations. that it is nearing the Binance user ceiling and its growth is unsustainable.

SEBATOKEN hopes to generate immense value for our community.

NFT MARKETPLACE

NFT Marketplace is a vital part of our ecosystem dealing with NFT'S. Blockchain provides the ability to create Non-Fungible tokens (NFTs) which are unique, non-interchangeable assets, minted on-chain.

These tokens can be linked to anything from digital Anime to physical assets. The core attributes of NFTs give them unique value and categorically separate them from other types of assets.

These properties include being verifiably unique and indivisible.

The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework in Tokens (NFT) is now unlocking fresh business models for the creators of digital and physical collectibles.

NFTs are being utilized for digital arts, digital property, and other applications where each tradable NFT has its own unique attributes and value. NFTs can be allocated to unique accounts. People can feel confident that they truly own an original asset and can verify their ownership on a public blockchain.

LIQUIDITY

After providing liquidity the liquidity providers receive LP tokens. Users pay fees for trading on DEX, which is allocated to liquidity providers depending on the quantity of LP tokens or the percent share they own in the pool. LP may suffer a temporary loss as a result of providing liquidity, and they may not get the same number of coins back.

The SEBATOKEN protocol guarantees that token holders' assets are immediately taken and locked for liquidity. The primary goal is to keep the holder informed about the SEBATOKEN performance by avoiding whale dips when they are used in a mass trade-off.

SEBATOKEN secret is Automatic LP. We have a function here that serves as a dual-beneficial implementation for holders.

At the beginning, the contract collects tokens from both sellers and purchasers and adds them to the LP, establishing a stable price floor.

Second, the penalty serves as an arbitrage-resistance mechanism, ensuring that the volume of SEBATOKEN remains safe as a reward for the holders. In principle, the additional LP provides stability by adding the tax to the token's total liquidity, thus raising the token's overall LP and maintaining the token's price floor.

REFLECTION

Reflection is also known as static rewards, aims to prevent price collapses and valuation bubble busts caused by liquidity provider (LP) farming rewards.

Manual burns assist in rewarding and informing the community.

The manual burn's circumstances and quantities are publicized and monitored.

During larger collapses, this automatic liquidity pool offers stability.

When whales sell big positions, automatic LP keeps the price from fluctuating too much.

STAKING

SEBATOKEN works on the Binance platform, which is eco-friendly and working on a proof of stake. In addition to being the largest crypto exchange by trading volume, Binance offers exemplary staking services. Binance staking protects users' funds by utilising effective security measures and providing a Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and eco-friendly methods (for cryptocurrency) to earn passive income.

All staked tokens are stored on the platform using a secure wallet and a double-checking system. As more people, including institutional investors, recognize the crypto market's lucrativeness, crypto staking is quickly becoming a trend of earning passive income by simply holding or locking funds in a wallet.

Since staking cryptos requires some technical crypto's know-how and damming, SEBATOKEN staking platforms come in handy to allow investors, even those without technical knowledge of cryptos, to stake PoS coins and earn rewards by lending them the staking platform technical expertise and validates stakes on investors behalf, enabling you to earn passive income.

The substantial growth of crypto staking has seen a boom in staking platforms allowing investors to earn staking rewards seamlessly. If you're thinking of making passive income through staking Then SEBATOKEN is a fantastic option.

WHY SEBATOKEN?

Transparency & immutability

With the SEBA, each time a token exchange is recorded on the BINANCE blockchain, an audit trail is present to trace where the tokens came from. This can not only help to improve security and prevent fraud in exchange-related businesses, but can also help verify the authenticity of the traded assets.

Lower Fees

The fees associated with SEBA transactions are significantly lower than those associated with debit and credit cards, as well as wire transfers and BACS payments.

TRUST

Trust is crucial in the bitcoin industry. This entails complete transparency in all aspects of community and development work, as well as security efforts.

SEBATOKEN has completed its security audit. We're glade to assure you that the inclusion of Binance Pegged BUSD increases user trust.

WHY SEBATOKEN ?

Transaction traceability

SEBA is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction.

SEBATOKEN is made up of a complex string of mathematical numbers and is impossible to be altered.

This immutable and incorruptible nature of SEBA makes it safe from falsified information and hacks once formed.

Ease to Use

Ease of use is the reason why SEBA has no value. All you need is a smart device and an internet connection to start making your own payments and money transfers.

LONGEVITY

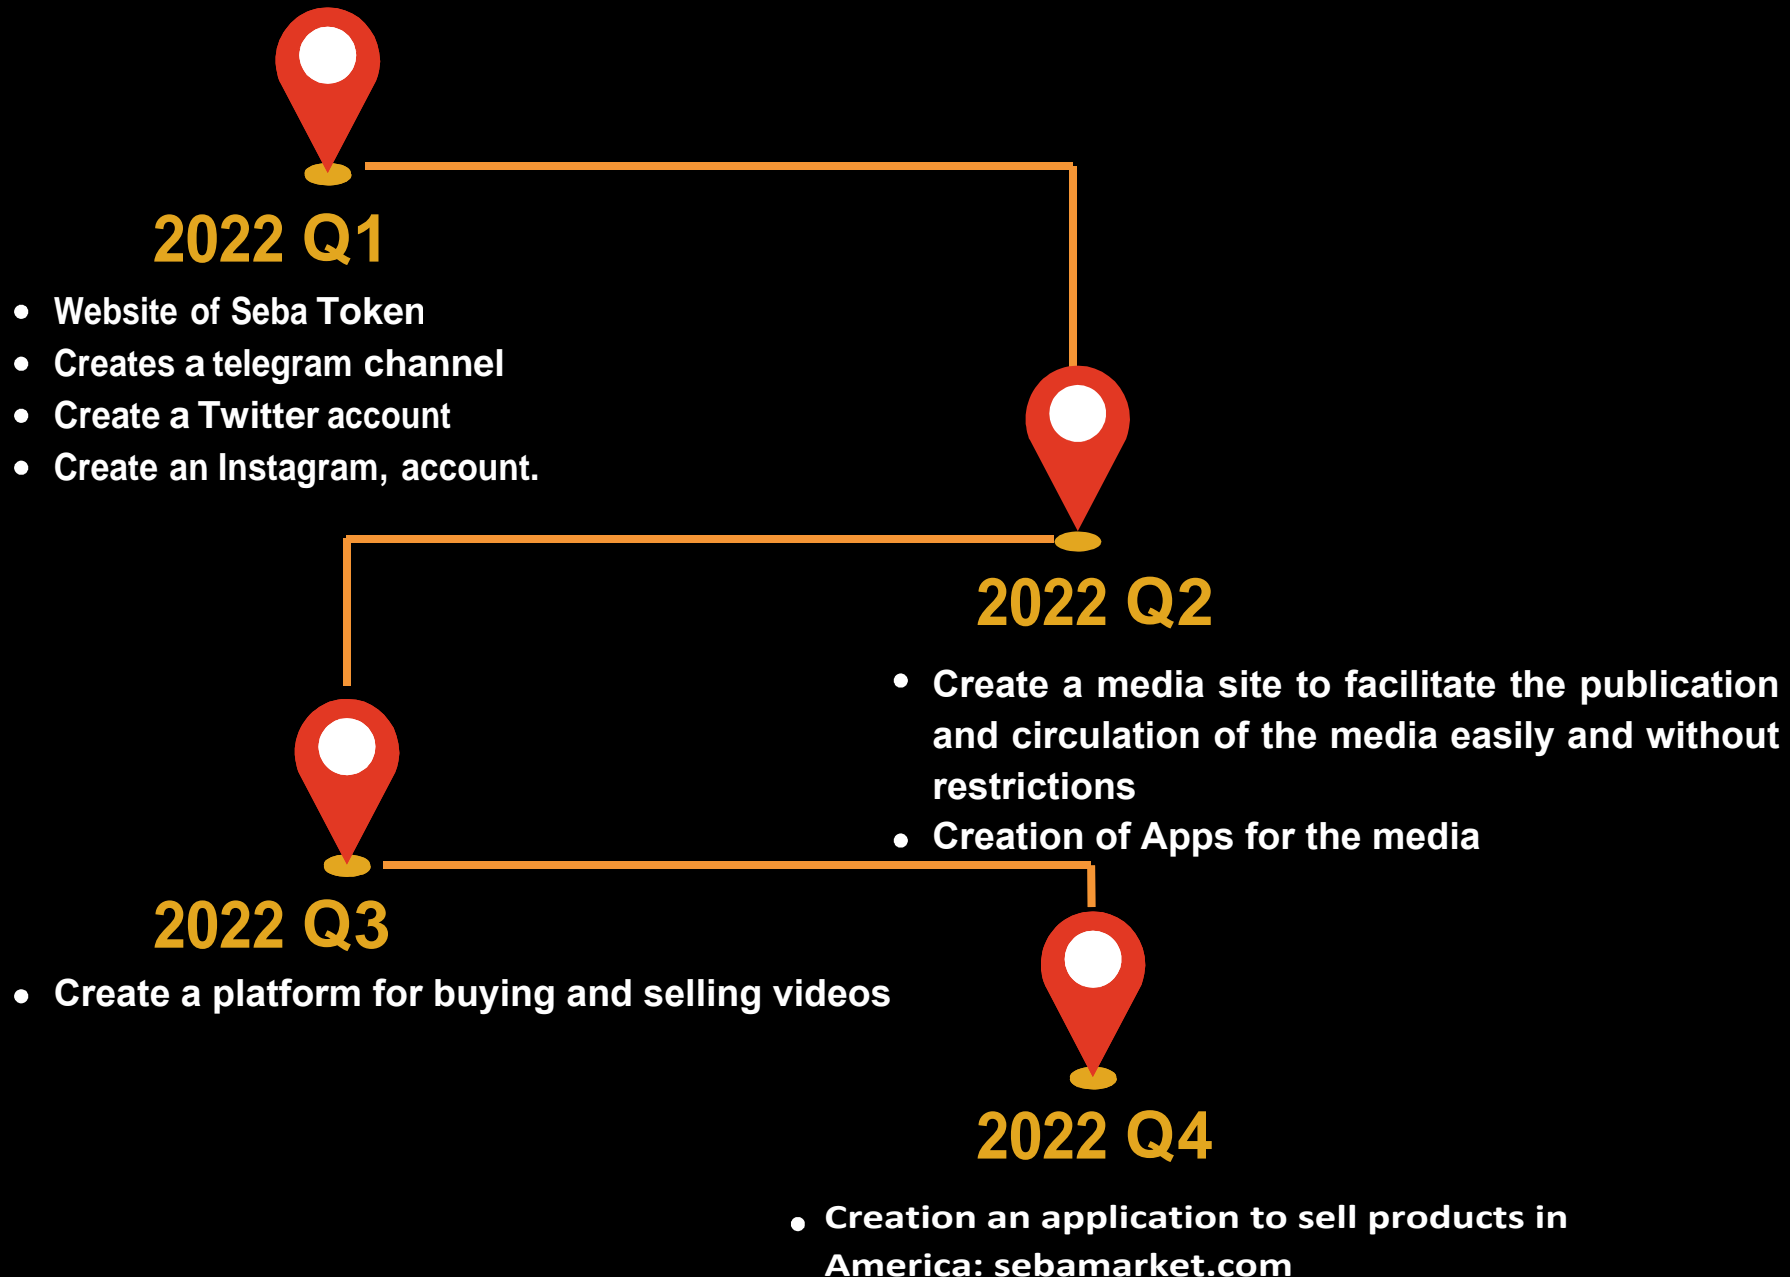

SEBATOKEN is here to stay. The decentralized community encourages and embraces long-term ecosystem and foundation development to generate genuine use cases and higher benefits than any ephemeral fad.
